Rubber Guns:

These are high quality, authentic-weight synthetic hand guns and rifles. They are available from the manufacturer in either the blue below or in black.

We would theme the weapons with chrome, brushed metal or black with distinctive grips (like pearl handled). We have had great success with these in the past. For a Spy Show, the weapons the Hero has are as important as the costume. Same for villains. Weapons are a very personal character choice.

In addition to hand held weapons, it is also important to select holsters and harnesses.
